KLINIKUM DER UNIVERSITÄT MÜNCHEN
WALTER-BRENDEL-CENTRE OF
EXPERIMENTAL MEDICINE
DIREKTOR: PROF. DR. MED. ULRICH POHL

Munich, 22/07/2011

Dear colleagues,

it is our pleasure to announce a 2-day workshop on "Light Microscopy of Small Arterial Vessels" which is planned especially for younger scientists interested in bioimaging. The workshop will be held in Munich on 10th and 11th October, shortly before the 2011 Microcirculation meeting. Participants of the workshop can still submit late bearing abstracts for the Microcirculation meeting (<http://www.microcirculation2011.de/>) as well.

For the workshop, we put together a list of leading specialists in the field of bioimaging, some of which will talk on specialized aspects of small arteries. Others will also cover more general important aspects of bioimaging, like typical problems (and solutions), new technical developments such as super resolution approaches and cellular calcium-measurements. There also will be practical sessions on several topics to choose from.

The full program and further information is available at <http://www.bin.lmu.de/2011>

Looking forward to seeing you in Munich!

Prof. Dr. med. Ulrich Pohl
President of the European Society for Microcirculation

(also for Steffen Dietzel)
